

Our facility in Winston-Salem is looking for a ...

Process Engineer

We are a world leader in the manufacturing of technical nonwovens for a wide range of applications in automotive, industrial, and agriculture areas.

Polyvlies, founded and headquartered in Germany in 1850, has five locations across Europe and the United States with more than 450 employees.

Responsibilities

- Develop, configure, and optimize our industrial processes
- Interact closely with our headquarters in Germany
- Assess processes, take measurements, and interpret data
- Design, run, test, upgrade systems and processes
- Develop the best practices, routines, and innovative solutions to improve production rates and quality of output
- Perform process simulations
- Manage cost and time constraints
- Perform risk assessments
- Create and provide process documentation and operating instructions

Requirements

- Excellent hands on technical skills
- Experience in process simulations
- Working knowledge of process engineering software packages
- Analytical thinker with interpersonal skills
- BS degree in Engineering
- Proven work experience in process engineering is a plus

This position will have the opportunity to develop into the position of plant manager. Training trips to Germany will be necessary as well as regular exchange of information. We offer a competitive salary and a comprehensive benefits package.
